## Indiana High School Science Courses for Core 40 Curriculum Model

Pursuant to Indiana Code 20-19-2-21, the Indiana State Board of Education adopted revised rules regarding science requirements for the Core 40 curriculum model. To earn a Core 40 Diploma designation, students are still required to obtain:

- (1) Two credits of Biology I;
- (2) Two credits of Chemistry I or Physics I or Integrated Chemistry-Physics; and
- (3) Two credits of any other Core 40 science course.

The Indiana State Board of Education approved an expanded list of courses for students to satisfy the third requirement following recommendations from a committee of content area experts representing both secondary and postsecondary institutions, industry/community partners, and the Governor's Workforce Cabinet.

Changes to Career and Technical Education (CTE) coursework and the launch of the Next Level Programs of Study (NLPS) has been incorporated to satisfy this science requirement. The full course list can be found below:
